

OMKAR GAVALI

Senior Frontend Engineer | React.js | Next.js | TypeScript | Redux | GraphQL | AWS | Docker | Kubernetes | Micro-Frontend Architecture

Pune, India | +91 7385551100 | omgavali94@gmail.com | [Visit LinkedIn](#) | [Visit GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with 5+ years of experience building scalable, enterprise-grade web applications across Banking, AI, Cloud, HRMS, Infrastructure, and E-commerce domains. Specialized in React.js, Next.js, TypeScript, JavaScript (ES6+), Redux, GraphQL, and micro-frontend architecture for developing high-performance, reusable, and scalable frontend systems. Experienced in cloud-native frontend engineering using AWS, Docker, Kubernetes, Terraform, Jenkins, and CI/CD automation pipelines. Strong expertise in frontend performance optimization, reusable component architecture, responsive UI engineering, WCAG accessibility, and API-driven application development. Proven ability to collaborate with cross-functional teams, contribute to frontend modernization initiatives, and deliver scalable product engineering solutions in Agile environments. Passionate about building scalable frontend systems and delivering high-quality digital experiences for enterprise applications.

CORE TECHNICAL SKILLS

- **Frontend Technologies:** React.js, Next.js, JavaScript (ES6+), TypeScript, Redux, Redux Toolkit, Redux-Saga, React Hooks, Context API, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI
- **Architecture & UI Engineering:** Micro-frontend Architecture, Component-Driven Development, Design Systems, Atomic Design, Responsive Web Design, Reusable Component Libraries, Frontend Modernization
- **Performance Optimization:** Code Splitting, Lazy Loading, Dynamic Imports, Memoization, Lighthouse Optimization, Core Web Vitals, Rendering Optimization
- **API & Integration:** GraphQL, REST APIs, OpenAI API, Drupal CMS API, State Management, API Optimization, WebSockets
- **Cloud & DevOps:** AWS, Azure, Docker, Kubernetes, Terraform, Jenkins, CI/CD Pipelines, GitHub Actions
- **Testing & Quality:** Jest, React Testing Library, Enzyme, Unit Testing, Integration Testing, Debugging, Code Review, WCAG Accessibility
- **Tools & Platforms:** Git, GitHub, Jira, Rally, Postman, Agile/Scrum, Node.js, MongoDB, Python

KEY ACHIEVEMENTS

- Delivered 8+ enterprise-grade applications across Banking, AI, Cloud, HRMS, Infrastructure, and E-commerce domains using React.js, Next.js, and TypeScript.
- Improved frontend performance by up to 35% through code splitting, lazy loading, optimized rendering, and reusable component architecture.
- Achieved 95%+ unit and integration test coverage using Jest and React Testing Library, significantly reducing production defects.
- Reduced deployment time from hours to minutes by implementing Docker, Kubernetes, Jenkins, Terraform, and automated CI/CD workflows.
- Implemented scalable micro-frontend architecture for enterprise banking applications, enabling modular development and independent deployments.
- Integrated OpenAI GPT APIs and Drupal CMS APIs to build AI-driven conversational interfaces and dynamic content management systems.
- Contributed to frontend architecture discussions, sprint planning, stakeholder demos, and cross-functional delivery coordination.

PROFESSIONAL EXPERIENCE

Innoraft Solutions Private Limited | Software Developer | Sept 2025 – Present

- Developed scalable enterprise frontend applications using React.js, Next.js, TypeScript, Redux Toolkit, and REST APIs for AI-driven and content management platforms.
- Developed scalable, responsive, and production-grade frontend interfaces aligned with enterprise UI standards and modern frontend engineering practices.
- Implemented advanced taxonomy-based search functionality, improving content discoverability and enhancing user engagement across multiple devices.
- Optimized frontend architecture through reusable components, state synchronization, code refactoring, and rendering optimization techniques.
- Contributed to AI-powered conversational interfaces and Live Avatar workflows using OpenAI API integration and Drupal CMS APIs.
- Improved development workflow reliability through CI/CD support, debugging, peer reviews, and Agile sprint collaboration.

Ageit Endorse Pvt. Ltd., Pune | Sr. Software Engineer | May 2023 – Aug 2025

- Designed and developed enterprise-scale frontend applications across Banking, Cloud, HRMS, and Infrastructure domains using React.js, Next.js, TypeScript, Redux, Redux-Saga, GraphQL, and REST APIs.
- Led frontend implementation efforts for modular micro-frontend banking platforms, enabling scalable feature delivery and maintainable UI architecture.
- Configured and optimized CI/CD pipelines using Docker, Kubernetes, Jenkins, AWS, and Terraform for secure and automated deployments.
- Developed WCAG-compliant, responsive banking portals and HRMS applications with reusable component libraries and scalable frontend architecture.
- Managed complex asynchronous workflows using Redux-Saga and optimized frontend performance using lazy loading, memoization, and reusable state management strategies.
- Collaborated with Product Owners, QA teams, backend engineers, and DevOps teams during sprint planning, backlog refinement, architecture discussions, and stakeholder demos.

Primal Infosys, India | Jr. Front-End Engineer | Nov 2021 – Feb 2023

- Built and maintained responsive user interfaces using React.js, Redux, JavaScript, HTML5, CSS3, and REST API integrations.
- Improved application responsiveness, cross-browser compatibility, and frontend stability through debugging and rendering optimization.
- Collaborated with backend teams to integrate APIs and deliver scalable frontend solutions in Agile development environments.
- Maintained code quality using testing libraries, peer reviews, and reusable component practices.

Career Services, India | Frontend Intern | Oct 2020 – Oct 2021

- Contributed to frontend application development using React.js, Redux, JavaScript, HTML5, and CSS3.
- Developed reusable UI components and assisted in responsive layout implementation and UI issue resolution.
- Worked closely with senior developers to improve user experience and frontend maintainability.

ENTERPRISE PROJECT PORTFOLIO

Resideo Honeywell – Digital Banking Platform | Developed enterprise-grade banking interfaces for transaction workflows, account management, and profile management using React.js, Redux, TypeScript, REST APIs, AWS, Docker, Kubernetes, Terraform, and Jest. Improved frontend reliability and reusable component architecture while supporting Agile banking delivery.

- Developed enterprise-grade banking interfaces using React.js and Redux.
- Integrated secure REST APIs for transaction workflows and profile management.
- Improved reusable component architecture and frontend reliability.
- Tech Stack: React.js, Redux, TypeScript, AWS, Docker, Kubernetes, Terraform.

OUTSYSTEMM2 – Network Rail UK | Built operational dashboards and dynamic forms for rail infrastructure management and compliance tracking. Integrated secure REST APIs, optimized frontend rendering, and achieved 95%+ test coverage using Jest and React Testing Library.

Domain: Infrastructure & Cloud | **Role:** Frontend Engineer

- Developed operational dashboards and dynamic forms enabling real-time infrastructure monitoring and compliance tracking.
- Integrated secure REST APIs and optimized frontend rendering for scalable enterprise UI development.
- Achieved 95%+ unit and integration test coverage using Jest and React Testing Library.
- Contributed to frontend modernization initiatives and scalable frontend engineering practices.

Tech Stack: React.js, Redux, TypeScript, Azure, REST APIs, Docker, Kubernetes, Terraform, Jest

ANZ – Banking Operations Optimization | Led frontend development for banking workflow automation including KYC verification, loan processing, transaction tracking, and account search. Implemented micro-frontend architecture, Redux-Saga async flows, GraphQL integrations, Jenkins CI/CD pipelines, and AWS deployments.

- Led frontend development for banking workflow automation including KYC verification, loan processing, transaction tracking, and account search.
- Implemented scalable micro-frontend architecture and asynchronous workflows using Redux-Saga and GraphQL integrations.
- Configured Jenkins CI/CD pipelines and AWS deployment workflows for secure enterprise delivery.

- Improved frontend scalability and maintainability through reusable component architecture and modular frontend systems.

Tech Stack: React.js, Next.js, Redux-Saga, TypeScript, GraphQL, AWS, Docker, Kubernetes, Terraform, Jenkins

Ageit Endorse 360 – HRMS Platform | Developed scalable HRMS modules for payroll, recruitment, attendance, performance management, and employee self-service workflows using React.js, Next.js, Redux-Saga, Tailwind CSS, Docker, and Jenkins.

Domain: HRMS | **Role:** Frontend Engineer

- Engineered enterprise HRMS solutions for payroll, recruitment, attendance, performance management, and employee self-service workflows.
- Developed scalable and responsive frontend interfaces using reusable React.js component architecture.
- Managed complex application state using Redux and Redux-Saga for enterprise workflow handling.
- Collaborated with cross-functional teams to deliver scalable frontend solutions in Agile environments.

Tech Stack: React.js, Next.js, Redux, Redux-Saga, Tailwind CSS, REST APIs, Docker, Jenkins

LTTS – EVA AI | Developed AI-powered conversational interfaces using React.js, OpenAI GPT APIs, Drupal CMS APIs, and TypeScript to enable intelligent query handling and dynamic content delivery.

Domain: Artificial Intelligence | **Role:** Frontend Engineer

- Developed AI-powered conversational interfaces using React.js and OpenAI GPT APIs for intelligent query handling workflows.
- Integrated Drupal CMS APIs and optimized frontend workflows for dynamic content rendering and API-driven applications.
- Built reusable responsive UI components and improved frontend performance optimization.
- Participated in frontend architecture discussions and scalable AI application delivery.

Tech Stack: React.js, TypeScript, OpenAI API, Drupal CMS API, REST APIs, CI/CD

LTTS – Rafty | Built immersive Live Avatar UI experiences using Next.js and TypeScript with responsive Figma-based interfaces and optimized CI/CD workflows.

Domain: AI & Interactive Systems | **Role:** Frontend Engineer

- Built immersive Live Avatar UI experiences using Next.js and TypeScript for interactive enterprise applications.
- Developed responsive and production-grade frontend interfaces aligned with modern frontend engineering practices.
- Optimized application stability, rendering performance, and deployment workflows.
- Collaborated with backend engineers and design teams for scalable frontend implementation.

Tech Stack: Next.js, TypeScript, REST APIs, CI/CD, Responsive UI Engineering

LTTS – TechTadka | Implemented advanced taxonomy-based search, Redux Toolkit state management, reusable component systems, and frontend performance optimization for enterprise content-sharing platforms.

MoviePrime – Entertainment Streaming Platform | Developed responsive movie streaming interfaces with dynamic content filtering, authentication workflows, REST API integration, and optimized user experience using React.js and Material UI.

PROFESSIONAL CERTIFICATIONS

- Generative AI for Software Development — Coursera
- Generative AI: Prompt Engineering Basics — Coursera
- Docker & Kubernetes for Cloud-Native Deployments — Udemy
- Microsoft Azure Certification — Udemy
- Agile Fundamentals — Coursera
- Python with Data Science & Machine Learning — Simplilearn

Leadership & Collaboration

- Collaborated with cross-functional teams across Product, QA, Backend, and DevOps environments.
- Participated in architecture discussions, sprint planning, backlog refinement, and stakeholder demos.
- Conducted peer code reviews and contributed to frontend modernization initiatives.
- Supported Agile delivery and enterprise-scale frontend implementation efforts.

EDUCATION

B.E. in Electrical Engineering — DBATU Kolhapur | 2016 – 2021 | CGPA: 8.4

Diploma in Electronics & Telecommunication — MSBTE | 2012 - 2016

SSC — Oriental English Academy
